Dear Sir:

I am writing to introduce the reader to this publication. My first impression was that it must be a Government paper due to its' size. My second impression was that a biologist had compiled it due to its' detail.

I was wrong on both counts. It was done by a few concerned sportsmen who put in hundreds of hours of work and personal expense. Anyone offered this paper owes them the courtesy of reading it.

It shows the over-looked fish holding capabilities of the Red Deer River. Biologist and policy makers alike would be wise to consider this paper as scientific evidence and give it the merit it deserves.

A handwritten signature in cursive script that reads "Doug Wood".

Doug Wood
